

eHadir Attendance System

The Most Dynamic Attendance Management Software

eHadir was developed in accordance with the attendance circular of Malaysian Government. It is the most dynamic web-based attendance management software that provides a stable connection with assortment kinds of attendance devices by Ethernet/Wi-Fi/GPRS/3G and functioning as a private cloud to offer representative self-administration by mobile application and web browser.

Multiple administrators can access **eHadir** anywhere using a web browser. It can easily handle hundreds of devices and thousands of employees and their transactions.

eHadir accompanies an intuitive user interface that can oversee timetable, shift and schedule and can easily generate attendance report. It takes attendance management to a whole new level! You don't have to put off processing them till the end of the month. At last it's so effortless and less timewasting!
